PROJECTS / OPEN-SOURCE

Text2World ERP WEB Application | Link — *HTML, CSS, Javascript, SMTP API, Bootstrap*

The ERP WEB Application at Text2World Pvt. Ltd. School ERP is a responsive and secure interface that uses HTML, CSS, JavaScript, and Bootstrap. It features standard login fields,"Forgot Password","Student Dashboard" and "Parent Dashboard" options,and OTP-based authentication. The design is clean and mobile-friendly, showcasing good UI/UX practices and secure HTTPS integration for safe user login.

- Responsive Design: The layout adjusts seamlessly across various devices, ensuring accessibility on desktops, tablets, and smartphones.
- User Authentication Interface: The form includes fields for username and password, along with options like "Remember Me" and "Forgot Password," providing a comprehensive login experience.

YumXpress Desktop App | Link — *Java GUI, Java SE, Java Database Connectivity, Oracle Database, Spoonacular API, Mail API*

YumXpress Food Delivery Desktop App: Utilized Java GUI programming to develop a user-friendly and visually engaging desktop application for seamless food ordering, and efficient delivery management. Integrated secure user authentication, comprehensive food selection interface, and enjoyable food delivery experience.

M. Coaching Web Application | Link — *Html, CSS, Javascript, Bootstrap, SMTP API*

Created a responsive educational website using HTML, CSS, JavaScript, and Bootstrap to display courses, contact info, and institute details with a clean and user-friendly design. Ensured easy accessibility for students to browse course information, contact the institute,

Smart Contact Manager | Link *Spring boot, Java, MySQL, Thymeleaf, Java Email API, Javascript, CSS,*

It is a responsive and secure web app that lets users efficiently manage personal and professional contacts, with features to add, view, edit, and delete contacts. It prioritizes user experience and data security across all devices.
